

BLACK TWIG

Black Twig, an old Tennessee variety with a dark burgundy skin, was Andrew Jackson's favorite apple. It became one of the popular dessert varieties in the 19th and early 20th century. It is not ripe until October, has a very crisp flesh that is both sweet and tart, and it gets better the longer you keep it--if cared for properly--almost until Spring.

The ultimate in a tart apple. Tannic juice adds kick to sweet or hard cider.
